

# LONG LIVE THE CFE-CGC ENERGIES!

**Christian Taxil** at the General Meeting on december 14<sup>th</sup>, 2011.

**M**any projects have been conducted in 2011! We multiplied the actions of fame on many sites to be more known and to boost our ambitious development plan whose implementation allowed

us to increase by 11 % the number of our members this year.

We also performed, involving our activists, an important work of reflection on the future of energy, realized by publishing a White Paper. This book, which you will receive shortly, will be broadcasted widely to institutional investors and the press. It will allow us to promote our positions in a time when major decisions will be taken in the energy sector.

In order to always better answer the needs of our members and our activists, we also wanted to consolidate reactivity and synergies within the federal team and transparency in the management of the federation's organization. The extraordinary general meeting, on December 14th 2011, endorsed this reform by approving new statutes.

It was also the opportunity to adopt a new identity easier and more powerful for our union. Now "CFE-CGC Energies" will bring loud and clear the values and the expectations of the management staff that we represent, in a context where social dialogue is undermined.

We have also established networks animation to provide our Company Committee elected members and Committee on health, safety and working conditions elected members our strength of action and assist them in carrying out their mandates. In addition, we commissioned a wide range of tools for the professionalism of our active members.

What's up for 2012? The highlight of the year will be our Congress held from June 19th to 22nd to set up a new team and define federal guidelines of our organization for the coming term of office.

The election of the CMCAS\* administrators will be another important event of the year 2012. Here we have the opportunity to finally move the lines in managing social activities in a time when the management of the CCAS\* is widely questioned. The mobilization of all of us must be exemplary in these elections!

At the beginning of this New Year, I send you and your family my warmest wishes.

Happy New Year 2012 full of energy!
